VOLUME CONTENTS

JANUARY/FEBRUARY

Special Issue: EXOBIOLOGY
(A) Planetology and the Origins of Life

Bruston, P., Raulin, F.	**Planetology and the Origins of Life: From Space Exploration to Exobiology, and Related Interdisciplinary Programs 1**
Rosenqvist, J., Chassefière, E.	**Inorganic chemistry of O_2 in a dense primitive atmosphere 3**
Kasting, J. F.	**O_2 concentrations in dense primitive atmospheres: commentary 11**
Dobrijevic, M., Parisot, J. P., Dutour, I.	**A study of chemical systems using signal flow graph theory: application to Neptune 15**
Vanssay, E. de, Gazeau, M. C., Guillemin, J. C., Raulin, F.	**Experimental simulation of Titan's organic chemistry at low temperature 25**
Speller, C. V., Vacher, J. R., Duc, E., Fitaire, M.	**Mass spectrometric study of three-body ion–molecule clustering reactions of $C_pH_q^+$ ions with N_2 or CH_4 in N_2–CH_4 mixtures 33**
Ricard, A., Cernogora, G., Fitaire, M., Hochard, L., Kouassi, N., Speller, C., Vacher, J. R.	**Measurements in N_2–CH_4(C_2H_2) discharges of reaction rates and thermochemical constants for Titan atmosphere study 41**
Cabane, M., Chassefière, E.	**Laboratory simulations of Titan's atmosphere: organic gases and aerosols 47**
Edwards, S. A., Tchang-Brillet, W.-Ü L., Roncin, J.-Y., Launay, F., Rostas, F.	**Modelling the VUV emission spectrum of N_2: preliminary results on the effects of rotational interactions on line intensities 67**
Guillemin, J.-C., Lassalle, L., Janati, T.	**Germane photochemistry. Photolysis of gas mixtures of planetary interest 75**
Bénilan, Y., Bruston, P., Raulin, F., Courtin, R., Guillemin, J.-C.	**Absolute absorption coefficient of C_6H_2 in the mid-UV range at low temperature; implications for the interpretation of Titan atmospheric spectra 83**
Chassefière, E., Cabane, M.	**Two formation regions for Titan's hazes: indirect clues and possible synthesis mechanisms 91**
Rowe, B. R., Parent, D. C.	**Techniques for the study of reaction kinetics at low temperatures: application to the atmospheric chemistry of Titan 105**
Prieur, D., Erauso, G., Jeanthon, C.	**Hyperthermophilic life at deep-sea hydrothermal vents 115**
Hartman, H., McKay, C. P.	**Oxygenic photosynthesis and the oxidation state of Mars 123**
Inglebert, R. L., Klossa, B., Lorin, J. C., Thomas, R.	**Proposed *in situ* secondary ion mass spectrometry on Mars 129**

Mautner, M. N., Leonard, R. L., Deamer, D. W. — **Meteorite organics in planetary environments: hydrothermal release, surface activity, and microbial utilization 139**

(B) Life: Origin, Evolution and Adaptation to Extreme Environments

Brack, A., Horneck, G. — **Life: Origin, Evolution and Adaptation to Extreme Environments, Wiesbaden, May 1993 151**

Holm, N. G., Andersson, E. M. — **Abiotic synthesis of organic compounds under the conditions of submarine hydrothermal systems: a perspective 153**

Schwartz, A. W. — **The RNA World and its origins 161**

Forterre, P. — **Looking for the most "primitive" organism(s) on Earth today: the state of the art 167**

Cabrol, N. A., Grin, E. A. — **A morphological view on potential niches for exobiology on Mars 179**

Horneck, G. — **Exobiology, the study of the origin, evolution and distribution of life within the context of cosmic evolution: a review 189**

Fast Track

Ip, W.-H. — **Time variations of the Jovian synchrotron radiation following the collisional impacts of comet Shoemaker–Levy 9—2. Flux enhancement induced by neutral atmospheric turbulence 221**

Grayzeck Jr, E. J., Klinglesmith III, D. A., Niedner Jr, M. B., A'Hearn, M. F. — **Generation of the IHW Comet Halley CD-ROM Archive 225**

MARCH/APRIL

Special Issue: SMALL BODIES IN THE SOLAR SYSTEM — ORIGIN, EVOLUTION, AND SIGNIFICANCE FOR THE FORMATION OF PLANETS

Stöffler, D. — **Preface: Results of a Priority Programme of the Deutsche Forschungsgemeinschaft DFG (German Research Foundation) from 1987 to 1993 239**

THEORY OF SOLAR SYSTEM FORMATION

Riegger, J. M. — **Particle simulation of supersonic convection in the protostellar nebula 243**

Däther, M. — **The luminosity of the collapsing presolar nebula 253**

Sterzik, M. F., Herold, H., Ruder, H., Willerding, E. — **Local particle simulations of viscous self-gravitating disks 259**

Stahl, B., Kiessling, M. K.-H., Schindler, K. — **Phase transitions in gravitating systems and the formation of condensed objects 271**

Willerding, E. — **Evolutionary processes in the protoplanetary accretion disk 283**

Osterbart, R., Willerding, E. — **Collective processes in planetary rings 289**

ASTRONOMICAL OBSERVATIONS AND INTERPRETATIONS

Fahr, H. J., Scherer, K., Banaszkiewicz, M. — **The evolution of the zodiacal dust cloud under plasma drag and Lorentz forces in the latitudinally asymmetric solar wind 301**

Schertl, D., Grieger, F., Hofmann, K.-H., Mauder, W., Reinheimer, T., Weghorn, H., Weigelt, G. — **High-resolution speckle masking observations of Ceres and Vesta 313**

Börngen, F. — **The Tautenburg minor planets (1987–1992) 321**

COMETS AND COMET SIMULATION EXPERIMENTS

Möhlmann, D. — **Cometary activity and nucleus models 327**

Kührt, E., Keller, H. U., Lorenz, E. — **Interpretation of surface temperatures and activity of KOSI samples 333**

Lorenz, E., Knollenberg, J., Kroker, H., Kührt, E. — **IR observations of KOSI samples 341**

Benkhoff, J., Seidensticker, K. J., Seiferlin, K., Spohn, T. — **Energy analysis of porous water ice under space-simulated conditions: results from the KOSI-8 experiment 353**

Lämmerzahl, P., Gebhard, J., Grün, E., Klees, G. — **Gas release from ice/dust mixtures: results from eleven KOSI experiments 363**

Thiel, K., Kölzer, G., Kochan, H., Lämmerzahl, P., Lorenz, E. — **Phenomenology and dynamic behavior of the dust component in the KOSI experiments 375**

Kölzer, G., Grün, E., Kochan, H., Lämmerzahl, P., Thiel, K. — **Dust particle emission dynamics from insolated ice/dust mixtures: results from the KOSI 5 experiment 391**

INTERPLANETARY DUST AND METEORITES

Bohsung, J., Arndt, P., Jessberger, E. K., Maetz, M., Traxel, K., Wallianos, A. — **High resolution PIXE analyses of interplanetary dust particles with the new Heidelberg proton microprobe 411**

Braun-Dullaeus, K.-U., Traxel, K. — **Copper, zinc, gallium and germanium distributions in taenite lamellae of iron meteorites and their importance for cooling rate estimations 429**

Beckerling, W., Bischoff, A. — **Occurrence and composition of relict minerals in micrometeorites from Greenland and Antarctica — implications for their origins 435**

Wulf, A. V., Palme, H., Jochum, K. P. — **Fractionation of volatile elements in the early solar system: evidence from heating experiments on primitive meteorites 451**

Müller, W. F., Weinbruch, S., Walter, R., Müller-Beneke, G. — **Transmission electron microscopy of chondrule minerals in the Allende meteorite: constraints on the thermal and deformational history of granular olivine–pyroxene chondrules 469**

Geiger, T., Bischoff, A. — **Formation of opaque minerals in CK chondrites 485**

Metzler, K., Bobe, K. D., Palme, H., Spettel, B., Stöffler, D. — **Thermal and impact metamorphism on the HED parent asteroid 499**

Kunz, J., Trieloff, M., Bobe, K. D., Metzler, K., Stöffler, D., Jessberger, E. K. — **The collisional history of the HED parent body inferred from ^{40}Ar–^{39}Ar ages of eucrites 527**

Herpers, U., Vogt, S., Bremer, K., Hofmann, H. J., Suter, M., Wieler, R., Lange, H.-J., Michel, R. — **Cosmogenic nuclides in differentiated Antarctic meteorites: measurements and model calculations 545**

Michel, R., Lüpke, M., Herpers, U., Rösel, R., Suter, M., Dittrich-Hannen, B., Kubik, P. W., Filges, D., Cloth, P. — **Simulation and modelling of the interaction of galactic protons with stony meteoroids 557**

FAST TRACK

Jorda, L., Rickman, H. — **Comet P/Wirtanen, summary of observational data 575**

MAY

The International Mars Exploration Working Group — **International strategy for the exploration of Mars 581**

Mian, Z. U., Tozer, D. C. — **The present as history: an ensemble approach to terrestrial planet evolution 597**

Jakowski, N., Förster, M. — **About the nature of the Night-time Winter Anomaly effect (NWA) in the F-region of the ionosphere 603**

Chow, V. W., Rosenberg, M. — **Electrostatic ion cyclotron instability in dusty plasmas 613**

Rosenberg, M., Krall, N. A. — **Modified two-stream instabilities in dusty space plasmas 619**

Thompson, P., Dougherty, M. K., Southwood, D. J. — **Wave behaviour near critical frequencies in cold bi-ion plasmas 625**

Melandsø, F., Shukla, P. K. — **Theory of dust-acoustic shocks 635**

De Angelis, G. — **Asteroid spin, pole and shape determinations 649**

Dotto, E., Barucci, M. A., Fulchignoni, M. — **Ground-based Ida model: comparison with the first *Galileo* image 683**

Fulchignoni, M., Barucci, M. A., Tedesco, E. F. — **A comparison of the G-mode and the three-parameter asteroid taxonomic classification techniques using a common data set 691**

Letter
Mills, A. A., Sims, M. R. — **pH of the Martian surface 695**

Book Review
Bonnet, R. M. — **Discovering the Secrets of the Sun by R. Kippenhahn 697**

JUNE

Special Issue: *Asteroids, Comets and Meteors 1993—V*

Cosmovici, C. B., Schwarz, G., Ip, W. H., Fink, U. — **Imaging of H_2O^+ in the coma of comet Halley 699**

Bolatto, A. D., Fernández, J. A., Carballo, G. F. — **Asymmetric nongravitational forces on long-period comets 709**

Liou, J. C., Dermott, S. F., Xu, Y. L. — **The contribution of cometary dust to the zodiacal cloud 717**

Wu, Z., Williams, I. P. — **P/Giacobini–Zinner and the Draconid meteor shower 723**

Campins, H., Osip, D. J., Rieke, G. H., Rieke, M. J. — **Estimates of the radius and albedo of comet–asteroid transition object 4015 Wilson–Harrington based on infrared observations 733**

Jorda, L., Hainaut, O., Smette, A. — **Photometric study of comets P/Faye 1991 XXI and Zanotta–Brewington 1992 III 737**

Hajduk, A., Hajdukova, M., Gajdos, S., Kostecky, P., Zigo, P., Cevolani, G., Grassi, G., Trivellone, G. — **The Bologna–Modra forward-scatter radar experiment: reflection properties of meteor trains 747**

Martinez Gonzalez, J. M., Lopez Garcia, A., Gil, A. O., Chernetenko, J. — **Orbit determination and errors of a star catalogue 751**

McBride, N., Taylor, A. D., Green, S. F., McDonnell, J. A. M. — **Asymmetries in the natural meteoroid population as sampled by LDEF 757**

Cevolani, G., Bortolotti, G., Franceschi, C., Grassi, G., Trivellone, G., Hajduk, A., Kingsley, S. P. — **The Bologna–Lecce forward scatter radar experiment: preliminary results 765**

Gammelgaard, P. — **Variable phase factors and color indices during the rotation of 51 Nemausa and a comparison of six apparitions 773**

Goidet-Devel, B., Renard, J. B., Levasseur-Regourd, A. C. — **Polarization of asteroids. Synthetic curves and characteristic parameters 779**

Afonso, G. B., Gomes, R. S., Florczak, M. A. — **Asteroid fragments in Earth-crossing orbits 787**

Hutton, R. G., Licandro, J., Gallardo, T. — **Pole coordinates of the asteroid 338 Budrosa: implication for the asteroidal family 124 797**

Nakamura, T., Yoshikawa, M. — **Exponential growth of round-trip error and instability of orbits of small bodies in the outer solar system 801**

Hestroffer, D., Morando, B. — **Observations of minor planets by Hipparcos 817**

Ivashkin, V. V., Smirnov, V. V. — **An analysis of some methods of asteroid hazard mitigation for the Earth 821**

Mann, I., Grün, E. — **Dust particles beyond the asteroid belt—a study based on recent results of the *Ulysses* dust experiment 827**

FAST TRACK

Racca, G. D. — **Moon surface thermal characteristics for moon orbiting spacecraft thermal analysis 835**

Book Review
Di Pippo, S. — **Beyond this World by Nigel Calder 843**

JULY

Lammer, H. — **Mass loss of N_2 molecules from Triton by magnetospheric plasma interaction 845**

Leliwa-Kopystyński, J., Kossacki, K. J. — **Kinetics of compaction of granular ices H_2O, CO_2 and $(NH_3)_x(H_2O)_{1-x}$ at pressures of 2–20 MPa and in temperatures of 100–270 K. Application to the physics of the icy satellites 851**

Exertier, P., Bois, E. — **Analytical solution of the perturbed circular motion: an extended formulation for various perturbations 863**

Russell, C. T., Mulligan, T., Delva, M., Zhang, T. L., Schwingenschuh, K. — **A simple test of the induced nature of the Martian tail 875**

Leonovich, A. S., Mazur, V. A. — **Magnetospheric resonator for transverse-small-scale standing Alfven waves 881**

Leonovich, A. S., Mazur, V. A. — **Linear transformation of the standing Alfven wave in an axisymmetric magnetosphere 885**

Misconi, N. Y., Pettera, L. E. — **On the possibility of solar dust ring formation due to increased dust-ion drag from coronal mass ejections 895**

Barkan, A., D'Angelo, N., Merlino, R. L. — **Laboratory experiments on electrostatic ion cyclotron waves in a dusty plasma 905**

Dupeyrat, L., Sotin, C. — **The effect of the transformation of basalt to eclogite on the internal dynamics of Venus 909**

Lin, J., Rijnbeek, R. P., Semenov, V. S., Kiendl, M. T., Biernat, H. K. — **Analysis of Petschek-type reconnection in a Y-type magnetic field distribution 923**

Corrigendum 939

AUGUST

Grün, E., Baguhl, M., Hamilton, D. P., Kissel, J., Linkert, D., Linkert, G., Riemann, R. — **Reduction of *Galileo* and *Ulysses* dust data 941**

Grün, E., Baguhl, M., Divine, N., Fechtig, H., Hamilton, D. P., Hanner, M. S., Kissel, J., Lindblad, B.-A., Linkert, D., Linkert, G., Mann, I., McDonnell, J. A. M., Morfill, G. E., Polanskey, C., Riemann, R., Schwehm, G., Siddique, N., Staubach, P., Zook, H. A. — **Three years of *Galileo* dust data 953**

Grün, E., Baguhl, M., Divine, N., Fechtig, H., Hamilton, D. P., Hanner, M. S., Kissel, J., Lindblad, B.-A., Linkert, D., Linkert, G., Mann, I., McDonnell, J. A. M., Morfill, G. E., Polanskey, C., Riemann, R., Schwehm, G., Siddique, N., Staubach, P., Zook, H. A. — **Two years of *Ulysses* dust data 971**

Raitala, J., Kauhanen, K., Black, M., Tokkonen, T. — **Crustal bending at Salme Dorsa on Venus 1001**

De Angelis, G., Mottola, S. — **Lightcurves and pole determinations for the asteroids 69 Hesperia, 79 Eurynome and 852 Wladilena 1013**

Brunini, A. — **A possible constraint to Uranus' great collision 1019**

Harrison, I. K., Swinerd, G. G. — **Analysis of satellite laser ranging data to investigate satellite aerodynamics 1023**

Chalov, S. V., Fahr, H. J. — **Entropy generation at the multi-fluid solar wind termination shock producing anomalous cosmic ray particles 1035**

SEPTEMBER

Wienbruch, U., Spohn, T. — **A self sustained magnetic field on Io? 1045**

Engel, S., Lunine, J. I., Hartmann, W. K. — **Cratering on Titan and implications for Titan's atmospheric history 1059**

Liritzis, I., Petropoulos, B., Xanthakis, J.Φ, Banos, C., Sarris, E. — **Detailed spectral analysis of Jupiter's Great Red Spot: relative intensities for the period 1963–1967 1067**

Bharuthram, R., Rao, N. N. — **Self-similar expansion of a warm dusty plasma—I. Unmagnetized case 1079**

Rao, N. N., Bharuthram, R. — **Self-similar expansion of a warm dusty plasma—II. Magnetized case 1087**

Sah, O. P. — **Small amplitude ion acoustic double layers in dusty plasmas 1095**

Gomberoff, L., Hernández, R., Livi, S. — **High energy tail formation due to right-hand polarized ion cyclotron waves 1101**

Biernat, H. K., Bachmaier, G. A., Kiendl, M. T., Erkaev, N. V., Mezentsev, A. V., Farrugia, C. J., Semenov, V. S., Rijnbeek, R. P. — **Magnetosheath parameters and reconnection: a case study for the near-cusp region and the equatorial flank 1105**

Oznovich, I., McEwen, D. J., Sivjee, G. G. — **Temperature and airglow brightness oscillations in the polar mesosphere and lower thermosphere 1121**

OCTOBER/NOVEMBER

Special Issue: DUST, MOLECULES AND BACKGROUNDS: FROM LABORATORY TO SPACE

Guest Editors: E. Bussoletti, L. Colangeli and V. Mennella

Dedication 1147

Bussoletti, E., Colangeli, L., Mennella, V. — **Foreword 1149**

MOLECULES–DUST–ICE/LABORATORY

Leach, S. — **Laboratory studies of polycyclic aromatic hydrocarbons, fullerenes and linear carbon chains in an astrophysical context 1153**

Salama, F., Joblin, C., Allamandola, L. J. **Neutral and ionized PAHs: contribution to the interstellar extinction 1165**

Wdowiak, T. J., Wei Lee, Cronin, J., Beegle, L. W., Robinson, M. S. **Plasma processing of interstellar PAHs into solar system kerogen 1175**

Ehrenfreund, P., Foing, B. H. **Search for fullerenes and PAHs in the diffuse interstellar medium 1183**

Joblin, C., Tielens, A. G. G. M., Allamandola, L. J., Léger, A., d'Hendecourt, L., Geballe, T. R., Boissel, P. **PAHs as the carriers of the 3.3 and 3.4 μm emission bands 1189**

Krełowski, J., Sneden, C., Hiltgen, D. **A survey of weak diffuse interstellar bands in selected ranges between 5600 and 7000 Å 1195**

Somerville, W. B. **Observations of diffuse interstellar bands and of interstellar polarization 1205**

Guillois, O., Nenner, I., Papoular, R., Reynaud, C. **The coal model applied to the Red Rectangle and the Galactic IR emission 1211**

Mennella, V., Colangeli, L., Bussoletti, E., Merluzzi, P., Monaco, G., Palumbo, P., Rotundi, A. **Laboratory experiments on cosmic dust analogues: the structure of small carbon grains 1217**

Sakata, A., Wada, S., Tokunaga, A. T., Narisawa, T. **Comparison of the absorption curves of soots, pitch samples and QCCs to the interstellar extinction curve 1223**

Buchta, C., D'Alessio, A., D'Anna, A., Gambi, G., Minutolo, P., Russo, S. **The optical characterization of high molecular mass carbonaceous structures produced in premixed laminar flames across the soot threshold limit 1227**
